1 Information systems outsourcing: a survey and analysis of the literature

Jens Dibbern, Tim Goles, Rudy Hirschheim, Bandula Jayatilaka

November 2004 **ACM SIGMIS Database**, Volume 35 Issue 4

Full text available: pdf(1.51 MB) Additional Information: full citation, abstract, references

In the last fifteen years, academic research on information systems (IS) outsourcing has evolved rapidly. Indeed the field of outsourcing research has grown so fast that there has been scant opportunity for the research community to take a collective breath, and complete a global assessment of research activities to date. This paper seeks to address this need by exploring and synthesizing the academic literature on IS outsourcing. It offers a roadmap of the IS outsourcing literature, highligh ...

2 Adoption, diffusion, and infusion of IT: Organizational adoption and assimilation of complex technological innovations: development and application of a new framework

Michael J. Gallivan

July 2001 **ACM SIGMIS Database**, Volume 32 Issue 3

Full text available: pdf(3.37 MB) Additional Information: full citation, abstract, references, citings, index terms

This paper explores the applicability of traditional innovation adoption and diffusion models to contingent, authority innovation processes occurring within an organizational context (Zaltman, Duncan & Holbeck, 1973); that is, when employees in organizations adopt an innovation that has been chosen by an authority figure. This paper identifies existing gaps in traditional innovation adoption models and concludes that a new framework is required --- one that incorporates the unique processes and ...

Keywords: technology adoption, technology diffusion

3 Logical foundations for knowledge representation in intelligent systems

B R Gaines

December 1986 **Proceedings of the ACM SIGART international symposium on Methodologies for intelligent systems**

Full text available: Additional Information:

pdf(1.32 MB) full citation, abstract, references, index terms

We have entered an era of intelligent system development in which fifth and sixth generation computing systems are expected to emulate and enhance natural intelligence. However, human knowledge processes are not well-understood and it is tempting to base the technology of intelligent systems on formal reasoning rather than human psychology. In particular, the attempt to base knowledge processing in fifth generation computing systems on logic programming suggests that we should examine the r ...

4 The effect of a priori views on the social implications of computing: the case of office automation

R. A. Hirschheim

June 1986 **ACM Computing Surveys (CSUR)**, Volume 18 Issue 2

Full text available: pdf(3.26 MB) Additional Information: full citation, abstract, references, citings, index terms, review

Office automation impact has received considerable attention in the literature recently. Unfortunately, that which has appeared is diverse and contradictory. The relevant literature is reviewed, summarized, and placed in a framework containing three positions on office automation impact: optimism, pessimism, and relativism. The basic assumptions and empirical support for each position are noted and analyzed. It is proposed that these positions are based on a number of a priori views which g ...

5 New challenges of systems development: a vision of the 90's

Kalle Lyytinen

June 1989 **ACM SIGMIS Database**, Volume 20 Issue 3

Full text available: pdf(1.31 MB) Additional Information: full citation, abstract, index terms

During the 90's substantial changes will occur in systems development. Its design objects such as technological base, content and nature of information processes, and the organizational environment of information systems will undergo a rapid change. Its context including user populations, development tools, methods, and governing organizational form will become more complex and varied. Finally, its process features such as the espoused phase model and preferred organizational strategy will under ...

1 Four paradigms of information systems development
Rudy Hirschheim, Heinz K. Klein
October 1989 **Communications of the ACM**, Volume 32 Issue 10
Full text available: pdf(2.09 MB) Additional Information: full citation, abstract, references, citings, index terms, review

Developing computer-based information systems necessarily involves making a number of implicit and explicit assumptions. The authors examine four different approaches to information systems development.

2 Extending constraint logic programming with open functions
Nikolay Pelov, Maurice Bruynooghe
September 2000 **Proceedings of the 2nd ACM SIGPLAN international conference on Principles and practice of declarative programming**
Full text available: pdf(511.47 KB) Additional Information: full citation, references, index terms

3 An epistemology of APL
J. Philip Benkard
July 1998 **ACM SIGAPL APL Quote Quad , Proceedings of the APL98 conference on Array processing language**, Volume 29 Issue 3
Full text available: pdf(1.08 MB) Additional Information: full citation, abstract, references, citings, index terms

Epistemology is the study of what we know and how we know it. In every day life this usually means trying to understand how we build a mental model which seems to correspond to the reality of the world around us. From the dot matrix of our retinas, with their million or so pixels, our brains recognize as units such objects as straight lines, curves, and human faces. From vibrations of nearby air molecules we hear conversations and C major triads. Ordinary people simply consider what w ...

4 Technical papers: A generic library of problem solving methods for scheduling applications
Dnyanesh Rajpathak, Enrico Motta, Zdenek Zdrahal, Rajkumar Roy
October 2003 **Proceedings of the international conference on Knowledge capture**
Full text available: pdf(361.64 KB) Additional Information: full citation, abstract, references, index terms

In this paper we describe a generic library of problem-solving methods (PSMs) for scheduling applications. Although, some attempts have been made in the past at developing libraries of scheduling methods, these only provide limited coverage: in some cases they are specific to a particular scheduling domain; in other cases they simply implement a particular scheduling technique; in other cases they fail to provide the required degree of depth and precision. Our library is based on a structured ap ...

Keywords: knowledge acquisition, knowledge reuse, ontologies, problem-solving methods, scheduling

5 Logical foundations for knowledge representation in intelligent systems

B R Gaines

December 1986 **Proceedings of the ACM SIGART international symposium on Methodologies for intelligent systems**

Full text available: pdf(1.32 MB) Additional Information: full citation, abstract, references, index terms

We have entered an era of intelligent system development in which fifth and sixth generation computing systems are expected to emulate and enhance natural intelligence. However, human knowledge processes are not well-understood and it is tempting to base the technology of intelligent systems on formal reasoning rather than human psychology. In particular, the attempt to base knowledge processing in fifth generation computing systems on logic programming suggests that we should examine the r ...

6 Planning text for advisory dialogues: capturing intentional and rhetorical information

Johanna D. Moore, Cécile L. Paris

December 1993 **Computational Linguistics**, Volume 19 Issue 4

Full text available: pdf(3.22 MB) Additional Information: full citation, abstract, references, citings

Publisher Site

To participate in a dialogue a system must be capable of reasoning about its own previous utterances. Follow-up questions must be interpreted in the context of the ongoing conversation, and the system's previous contributions form part of this context. Furthermore, if a system is to be able to clarify misunderstood explanations or to elaborate on prior explanations, it must understand what it has conveyed in prior explanations. Previous approaches to generating multisentential texts have relied ...

7 New challenges of systems development: a vision of the 90's

Kalle Lyytinen

June 1989 **ACM SIGMIS Database**, Volume 20 Issue 3

Full text available: pdf(1.31 MB) Additional Information: full citation, abstract, index terms

During the 90's substantial changes will occur in systems development. Its design objects such as technological base, content and nature of information processes, and the organizational environment of information systems will undergo a rapid change. 8 A cross-cultural investigation of the use of knowledge management systems

Youngjin Yoo, Michael J. Ginzberg, Joong Ho Ahn

January 1999 **Proceeding of the 20th international conference on Information Systems**

Full text available: pdf(119.76 KB) Additional Information: full citation, references, index terms

9 Software usability: choosing appropriate methods for evaluating online systems and documentation
Brad Mehlenbacher
November 1993 **Proceedings of the 11th annual international conference on Systems documentation**
Full text available: pdf(1.19 MB) Additional Information: full citation, references, citings, index terms

Keywords: quality, usability testing, user behavior, user-oriented design

10 Applications: Generating coherent argumentative paragraphs
Michael Elhadad
August 1992 **Proceedings of the 14th conference on Computational linguistics - Volume 2**
Full text available: pdf(639.52 KB) Additional Information: full citation, abstract, references, citings

We address the problem of generating a coherent paragraph presenting arguments for a conclusion in a text generation system. Existing text planning techniques are not appropriate for this task for two main reasons: they do not explain how *arguments* can be linked together in a linear presentation order and they do not explain how the rhetorical function of a proposition affects its wording.We present a mechanism to generate argumentative paragraphs where argumentative relations constrain n ...

11 The FINITE STRING newsletter: Abstracts of current literature
Computational Linguistics Staff
January 1986 **Computational Linguistics**, Volume 12 Issue 1
Full text available: pdf(2.24 MB) Additional Information: full citation

12 Betting boolean-style: a framework for trading in securities based on logical formulas
Lance Fortnow, Joe Kilian, David M. Pennock, Michael P. Wellman
June 2003 **Proceedings of the 4th ACM conference on Electronic commerce**
Full text available: pdf(310.53 KB) Additional Information: full citation, abstract, references, citings, index terms

We develop a framework for trading in compound securities: financial instruments that pay off contingent on the outcomes of arbitrary statements in propositional logic. Buying or selling securities---which can be thought of as betting on or against a particular future outcome---allows agents both to hedge risk and to profit (in expectation) on subjective predictions. A compound securities market allows agents to place bets on arbitrary boolean combinations of events, enabling them to more closel ...

Keywords: betting, combinatorial betting, compound securities markets, computational complexity of matching, gambling, hedging, information aggregation, risk allocation, speculating, trading in financial instruments based on logical formulas

13 Emancipating instances from the tyranny of classes in information modeling
Jeffrey Parsons, Yair Wand
June 2000 **ACM Transactions on Database Systems (TODS)**, Volume 25 Issue 2
Full text available: pdf(204.47 KB) Additional Information: full citation, abstract, references, citings, index

terms, review

Database design commonly assumes, explicitly or implicitly, that instances must belong to classes. This can be termed the assumption of inherent classification. We argue that the extent and complexity of problems in schema integration, schema evolution, and interoperability are, to a large degree, consequences of inherent classification. Furthermore, we make the case that the assumption of inherent classification violates philosophical and cognitive guidelines on classifica ...

Keywords: classification, conceptual modeling, database design, interoperability, ontology, schema evolution, schema integration

14 Qualitative engineering at various levels of conception design and evaluation of structures

Bruno M. Franck

June 1989 **Proceedings of the second international conference on Industrial and engineering applications of artificial intelligence and expert systems - Volume 1**

Full text available: pdf(852.80 KB) Additional Information: full citation, abstract, references, index terms

A multiple layer semantic net is proposed as a cognitive science framework to represent knowledge at various levels of abstractness. The multiple layers are qualitative at higher levels and quantitative at lower levels, and contain at all levels concepts that can be described by declarative and/or procedural statements. The semantic nets describe hierarchical knowledge associated with facts and events, and the procedures that are followed to process the information contained in the factual ...

15 An information company in Mexico: extending the resource-based view of the firm

Sirkka L. Jarvenpaa, Dorothy E. Leidner

December 1997 **Proceedings of the eighteenth international conference on Information systems**

Full text available: pdf(53.94 KB) Additional Information: full citation, references

Keywords: case study, competitive use of IS, computing in developing countries, international IS, resource-based view

16 A methodology for multiple rule system integration and resolutions within a singular knowledge base

Frank N. Kautzmann

February 1987 **Proceedings of the 15th annual conference on Computer Science**

Full text available: pdf(1.07 MB) Additional Information: full citation, abstract, references, index terms

Expert Systems which support knowledge representation by qualitative modelling techniques experience problems, when called upon to support integrated views embodying description and explanation, especially when other factors such as multiple causality, competing rule model resolution, and multiple uses of knowledge representation are included. MITRE Corporation, in conjunction with several directorates of NASA at Johnson Space Center, is currently developing a series of prototypes to demons ...

17 Probability and uncertainty: Epistemology probabilized

Richard Jeffrey

July 2001 **Proceedings of the 8th conference on Theoretical aspects of rationality and knowledge**

Full text available: pdf(780.14 KB) Additional Information: full citation, abstract, references

Here is a framework for judgment in terms of a continuum of "subjective" probabilities, a framework in which probabilistic judgments need not stand on a foundation of certainties. In place of propositional data bases, this radical probabilism ("probabilities all the way down to the roots") envisages full or partial probability assignments to probability spaces, together with protocols for revising those assignments and their interconnections in the light of fresh empirical or l ...

18 Development and use of a gold-standard data set for subjectivity classifications

Janyce M. Wiebe, Rebecca F. Bruce, Thomas P. O'Hara

June 1999 **Proceedings of the 37th conference on Association for Computational Linguistics**

Full text available: pdf(744.73 KB) Additional Information: full citation, abstract, references

This paper presents a case study of analyzing and improving intercoder reliability in discourse tagging using statistical techniques. Bias-corrected tags are formulated and successfully used to guide a revision of the coding manual and develop an automatic classifier.

19 ITiCSE 2000 working group reports: Integrating cultural issues into the computer and information technology curriculum

Joyce Currie Little, Mary Granger, Elizabeth S. Adams, Jaana Holvikivi, Susan K. Lippert, Henry M. Walker, Alison Young

June 2001 **Working group reports from ITiCSE on Innovation and technology in computer science education**

Full text available: pdf(1.33 MB) Additional Information: full citation, abstract, references, index terms

Industry leaders and educators in Computer and Information Technology (CIT) have expressed a need for graduates to have a background in professional, societal, and ethical concerns as well as a strong technical capability (Huff and Martin, 1995). Some educators have gone so far as to include cultural awareness: "The cultural dimensions of information technology can no longer be ignored, with the expansion of the global economy, global markets and global communication enabled by information techn ...

20 ITiCSE 2000 working group reports: Integrating cultural issues into the computer and information technology curriculum

Joyce Currie Little, Mary Granger, Elizabeth S. Adams, Jaana Holvikivi, Susan K. Lippert, Henry M. Walker, Alison Young

June 2001 **ACM SIGCSE Bulletin**, Volume 33 Issue 2

Full text available: pdf(1.33 MB) Additional Information: full citation, abstract, references

Industry leaders and educators in Computer and Information Technology (CIT) have expressed a need for graduates to have a background in professional, societal, and ethical concerns as well as a strong technical capability (Huff and Martin, 1995). Some educators have gone so far as to include cultural awareness: "The cultural dimensions of information technology can no longer be ignored, with the expansion of the global economy, global markets and global communication enabled by information techn ...

+"~epistemological ~grounds" +~constraint
Search

Nothing Found

Your search for **+"~epistemological ~grounds" +~constraint** did not return any results.

You may want to try an Advanced Search for additional options.

Please review the Quick Tips below or for more information see the Search Tips.

Quick Tips

- Enter your search terms in lower case with a space between the terms.

  ```
  sales offices
  ```

 You can also enter a full question or concept in plain language.

  ```
  Where are the sales offices?
  ```

- Capitalize proper nouns to search for specific people, places, or products.

  ```
  John Colter, Netscape Navigator
  ```

- Enclose a phrase in double quotes to search for that exact phrase.

  ```
  "museum of natural history" "museum of modern art"
  ```

- Narrow your searches by using a + if a search term must appear on a page.

  ```
  museum +art
  ```

- Exclude pages by using a - if a search term must not appear on a page.

  ```
  museum -Paris
  ```

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

```
museum +"natural history" dinosaur -Chicago
```
